

CLAIMS

Sub
A¹

1. A system for distributing music and data comprising:
first means for transmitting said data using a first network, said first network
being a wireless network;
second means for receiving said transmitting data;
third means for receiving user input; and
fourth means for storing a signal identifying said data in response to said user
input.

5

2. The invention of Claim 1 further including fifth means, responsive to said
stored signal, for retrieving said data from a second network.

3. The invention of Claim 1 wherein said fourth means includes a removable
electronic storage medium.

4. The invention of Claim 3 wherein said removable electronic storage medium is
a flash memory card.

5. The invention of Claim 2 wherein said second network is the Internet or World
Wide Web.

Sub
A²

6. The invention of Claim 1 wherein said data includes a plurality of music
selections.

Sub
C1

7. The invention of Claim 6 wherein said second means includes means for playing said music selections as they are received from said first means.

Sub
C1

8. The invention of Claim 1 wherein said first means is a satellite radio transmitter and said second means is a satellite radio receiver.

9. The invention of Claim 1 wherein said third means includes a voice recognition system.

Sub
C1

10. The invention of Claim 8 wherein said fifth means includes a kiosk.

11. The invention of Claim 1 further including means for selectively disabling said fourth means in response to a nonrecord-ability signal.

Sub
A3

12. The invention of Claim 1 further including means for selectively displaying information relating to said signal identifying said data.

13. A system for recording data comprising:

a satellite radio transmitter for transmitting said data;

a receiver for receiving said transmitting data;

means for receiving user input;

5 a removable electronic storage medium for storing a signal identifying said data in response to said user input; and

a computer, responsive to said stored signal, for retrieving said data from the Internet or World Wide Web.

Sc13

14. The invention of Claim 13 wherein said removable electronic storage medium is a flash memory card.

15. The invention of Claim 13 wherein said means for receiving user input includes a voice recognition system.

Sub A4

16. A system for distributing music and data comprising:
first means for transmitting said data using a first network, said first network being a wireless network;
second means for receiving said transmitting data;
third means for receiving user input;
fourth means for storing a signal identifying said data in response to said user input; and
fifth means for selectively disabling said fourth means in response to a nonrecordability signal.

10

17. A method for recording data including the steps of:
transmitting said data using a first network, said first network being a wireless network;
receiving said transmitting data;
receiving user input;
storing a signal identifying said data in response to said user input; and
retrieving said data from a second network in response to said stored signal.
